World Rugby Approved

PST Sport is the No. 1 choice for any club or school considering building a new pitch or resurfacing an older pitch. To date, we have built over 500 artificial grass pitches for clubs, schools, universities and local authorities, for all sporting codes, across Ireland and the UK.

By providing a complete 'Design and Build' service supported with a Professional Indemnity insurance policy we are protecting our clients' investment, now and into the future. PST Sport's experienced team also provide comprehensive aftercare and maintenance services for synthetic sports surfaces.

We have an experienced in-house design-led team with a strong focus on pre-construction. Our clients are guaranteed a comprehensive and fully managed turnkey service. Design, Commercial, Risk and Schedule Management are fully leveraged by PST Sport ensuring excellence in every project delivery.

WHO WE ARE

PST Sport is a Design & Build specialist contractor. We are an international company with a highly experienced senior management team focusing exclusively on the design and construction of state-of-the-art artificial grass sports surfaces. This includes subbase, playing surfaces and supporting infrastructure (*fencing, lighting & access*) for **Football, GAA, Rugby, Hockey and Tennis**.

With our Head Quarters in County Kerry, Ireland, PST Sport was formed with the view to building world-class artificial grass pitches, providing the highest levels of customer service, while staying true to our values; integrity, transparency and quality.

PST Sport's artificial turf systems are the most advanced in the market, anywhere in the world. In terms of carpet, our artificial grass is the very latest in synthetic turf technology; incredibly robust, durable, resilient, safe and player friendly for the ultimate sports performance. We offer a complete construction solution for any pitch development project, both green field sites and re-turfing existing pitches, covering design, pitch construction and project management. Our comprehensive range of services includes:

1. **DESIGN & PLANNING**
2. **SUBBASE CONSTRUCTION**
3. **FENCING & NETTING**
4. **SPORTS FLOODLIGHTS**
5. **SHOCK PAD & ARTIFICIAL GRASS**
6. **TESTING THROUGHOUT CONSTRUCTION**
7. **PITCH MAINTENANCE**

HOW WE CAN HELP

More and more clubs and schools are seeing the huge benefits of investing in an artificial grass pitch. PST Sport's artificial grass sports surfaces (both full-size pitches and training areas) provide a consistent playing surface for athletes and are designed to withstand heavy usage and stand up to the challenges of all sporting codes. This means our pitches provide a longer-lasting playing surface for athletes, and can be used in all weather conditions, year-round, which will in turn reduce downtime for repairs and maintenance.

OUR APPROACH

PST Sport is a solution based design and build contractor. With in-house expertise across each facet of pitch construction including groundworks and drainage, fencing, sports netting and floodlight systems, we offer a tailored solution unlike any other available in the market

We work alongside our clients' design teams as well as offering the '**PST Design & Build Service**' to deliver a world-class playing surface.

Our approach to every project begins with listening to our client and understanding each stakeholder's needs. We can be involved at the earliest stages of your project. We will meet you on-site and carry out a technical site survey to assist with the design and build process.

Our design services include planning advice, site surveys, detailed specifications, health and safety

plans, construction drawings and much more. Our design team puts quality and safety first, meeting all necessary regulations and abiding by the standards set down in our company's **ISO 9001** and **ISO 45001** policies. This is complemented by a world-class approach to building an artificial grass pitch.

PST Sport test our new build pitches throughout construction. Each 'measurable' element of the build process is tested by an independent test house and forms an integral part of our Quality Management System.

PST Sport's dedicated team will oversee your project focusing on quality, health and safety which are at the heart of everything we do, keeping you updated every step of the way.

✓ PST Sport's artificial grass pitches provide a more consistent playing experience, with no variation in hardness or firmness. This can help to improve player performance by providing a more stable playing surface, making the game more enjoyable for players as they are able to focus on their performance rather than the state of the playing surface.

INNOVATION & RESEARCH 'KEY' TO OUR SUCCESS

With a progressive attitude towards innovation, research and development is at the cornerstone of PST Sport's success to date. We are pioneers in terms of pitch base construction with ongoing research and development in-house perfecting the pitch base. We have spent three years working on our **PST Base™** subbase design Research & Development project. An undertaking supported with grant aid from Enterprise Ireland, we have proven that dynamic bases, when constructed correctly, will last the test of time.

PST Sport design and build pitches from the base up. We know and understand that the works below ground are a critical component of a well-designed artificial grass pitch, helping to ensure that the field provides a safe and durable surface for players. This ensures maximum longevity and stability of the pitch.

Our **PST Base™** project continues to evolve and will form a key part of our company's next R&D

project where our focus will be on building a greener and more sustainable business. Our core objective will be to build carbon neutral artificial grass pitches. Using less quarry stone, while achieving required compaction rates is central to this project.

Into the future our pitches will allow for rainwater harvesting, wind turbines, electric car charging points, vegetable allotments and other green solutions.

Typical PST Sport pitch base shown above

Fingal County Council approved PST Sport as the design and build company for the development of a full-size 13,500 sq/m artificial grass pitch at Le Chéile Secondary School in Tyrrelstown, Co. Dublin (pictured below). For this particular project we took on a design and build role and worked seamlessly with principal contractors, Glasgiven Contracts Ltd., who were the main contractors for Tyrrelstown Educational Campus.

The project below ground is just as important as what goes on top. Get this stage right and the lifespan of your pitch.

“ PST Sport took a lead in the design development of the pitch and proactively engaged with all stakeholders and brought to the table cost effective and workable solutions without compromising on safety, quality or programme.

PST Sport completed this project safely on time, within budget and to the highest standards. The standard of finish achieved by PST Sport on the pitch is exemplary and is a credit to the management and operatives who we found to be courteous, knowledgeable and driven.

THE MOST ADVANCED SYNTHETIC TURF SYSTEMS

PST Sport, along with our partner CCGrass, have developed a game changing artificial grass sports surface called Superb - the product of choice for clubs such as Munster Rugby, St Vincent's GAA, Barnet FC, Hemel Hempstead Town FC, and many more.

Superb has unrivalled characteristics, including an industry high dtex of 17,000, diamond shaped blade 400 micron wide, PU backing, a C8 polymer compound and successful Lisport wear testing up to 500,000 cycles. These unique qualities, when combined, allow CCGrass and PST Sport to offer an extended warranty of 12 years - 4 years more than the industry norm of 8 years.

Whilst soft to touch and feel, the Superb blade is still highly resilient and therefore will stand up longer, improving player performance and make maintenance easier.

Available in various pile heights, with a secondary thatched or fibrillated yarn when required, Superb has revolutionised the artificial grass industry for clients with FIFA, World Rugby and GAA synthetic pitch requirements.

From subbase construction to the artificial grass surface, PST Sport leads the way amongst CCGrass clients in over 110 countries.

ARTIFICIAL GRASS PARTNER

PST Sport & CCGrass: Working Together & Winning Together for Over 10 Years

PST Sport's artificial grass partner is CCGrass, the world's leading manufacturer of synthetic turf, with the largest artificial turf manufacturing facility in the world. CCGrass are at the forefront of product development, driving quality and performance for international governing bodies and are one of only four global producers with "Preferred Producer" status for FIFA, World Rugby and FIH.

Football Foundation Framework

With our dedication to sports construction, PST Sport and CCGrass have been delivering outstanding sports facilities to our clients for over a decade. In addition, PST Sport working in partnership with CCGrass, have been selected as one of just six exclusive artificial grass pitch providers to the Football Foundation's Artificial Grass Pitch Framework.

WHY CHOOSE PST SPORT?

DESIGN & BUILD SPECIALIST CONTRACTOR

PST Sport provide a complete construction solution for any pitch development project. We manage the whole project from concept to construction, supported with a professional indemnity insurance policy protecting our clients' investment, now and into the future. We look at our clients' needs and tailor a pitch design around this, ensuring maximum value for money and return on investment.

ARTIFICIAL GRASS PARTNER

PST Sport's artificial grass partner is CCGrass, the world's leading manufacturer of synthetic turf and one of only four companies with Preferred Producer status for FIFA, World Rugby and FIH. Working in partnership with CCGrass, we have been selected as one of just six exclusive artificial grass pitch providers to the Football Foundation's Artificial Grass Pitch Framework.

COMPLETE TURNKEY SOLUTION

PST Sport is a one-stop shop for any club, school or sporting organisation considering building a new artificial grass pitch or resurfacing an existing one. We provide a comprehensive range of services, including planning advice, design, state-of-the-art pitch construction, project management, testing throughout construction, and pitch maintenance.

QUALITY, HEALTH & SAFETY

Quality is one of PST Sport's core values and an integral part of our organisation. PST Sport's Quality, Health & Safety Management System is built on the premise of 'do it once, do it right'. All parts of a PST Sport pitch are monitored in an appropriate way abiding by the standards set down in our company's ISO 9001 and ISO 45001 policies.

SUBBASE CONSTRUCTION

Works below ground are a critical element in constructing an artificial grass pitch to guarantee its longevity. Issues with levels and drainage capacity in an aging pitch subbase is common place in the artificial grass pitch industry. PST Sport have developed a pioneering subbase design ensuring pitch stability for the long term and removing all uncertainty preconstruction.

Many pitch bases are built without taking existing ground conditions into account. PST Sport are using innovative ground testing methods, combining science and mathematics to design our pitch subbase, the outcome of which ensures the long-term stability of a PST Sport pitch.

TESTING THROUGHOUT CONSTRUCTION

While testing is a requirement for certain projects where accreditation from a sports governing body is required - **FIFA/WR/FIH**, PST Sport voluntarily test our new build pitches throughout construction. Each 'measurable' element of the construction process is tested by an independent test house (usually Sports Labs) and forms an integral part of PST Sport's **Quality Management System**. These test reports are included in the handover package to each client group.

HIGHLY SKILLED TEAM

With in-house expertise across each facet of pitch construction, our highly skilled team have the experience and technical ability to deliver a world-class artificial grass pitch.

WARRANTIES

PST Sport provide the most comprehensive warranties in the artificial grass pitch industry both in terms of manufacturer and PST Sport's workmanship warranty.

ACCREDITATIONS, PARTNERSHIPS & MEMBERSHIPS

QUALITY, HEALTH & SAFETY

PST Sport has robust Quality and Health & Safety Management Systems built on the premise of ‘do it once, do it right’ and is operated across all PST projects and offices. PST takes pride in our approach to Quality Management and our documented processes help us to ensure that all projects are delivered to the highest specification, both on time and within budget. PST has been awarded the following certifications demonstrating our compliance to the the highest Quality and Health & Safety Standards.

- **ISO 9001 for Quality Standards**
- **ISO 45001 for Health & Safety Standards**

SAPCA

PST Sport is a member of SAPCA, the UK trade association for the Sports and Play Construction Industry.

BITA

PST Sport is a member of BITA, The British and Irish Trading Alliance.

CONSTRUCTIONLINE

PST Sport is a Gold Member of Constructionline, the UK’s largest procurement and supply chain management service for the construction industry.

IRDG INNOVATION NETWORK

PST Sport is a member of the Industry Research and Development Group.

PARTNERSHIP WITH SOUTHERN FOOTBALL LEAGUE & MUNSTER SENIOR LEAGUE

PST Sport has a great history of supporting grassroots sport and very few things can bond communities in the same way that sport does. We are proud to partner with the Southern Football League in the UK and Munster Senior League in Ireland. This demonstrates our commitment to Football and specifically, grassroots football.

BECKETT PARK, CHERRYWOOD, CO. DUBLIN

PST Sport was selected to design and build a 7,000 sq/m FIFA Quality pitch, 6 ITF Approved artificial grass tennis courts, bowling greens and a 600 sq/m multi-use games area at Beckett Park, a 13-acre recreational park and part of the Cherrywood development. Cherrywood is Dublin’s most significant building project in recent years. Along with FIFA Quality certification, the 3G pitch was successfully tested to World Rugby and GAA standards.

WORLD-CLASS ARTIFICIAL GRASS PITCHES FOR FOOTBALL

PST Sport is an internationally recognised leader in artificial grass sports pitches for football. We offer a complete turnkey solution for any size football surface, from full-size pitches to training areas. To date, we have worked with some of the biggest names in sport and provide a custom pitch design solution based on our clients' requirements, ensuring maximum value for money and return on investment. Our extensive portfolio includes

over 50 FIFA certified artificial grass fields as well as training surfaces.

In January 2023, PST Sport, working in partnership with our colleagues CCGrass, the world's leading manufacturer of synthetic turf, were selected as one of just six exclusive artificial grass pitch providers to the Football Foundation's Artificial Grass Pitch Framework in England.

LARKVIEW BOYS FC, DUBLIN

7,800 sq/m FIFA Quality Approved

PST Sport installed a full-size FIFA Quality Approved artificial pitch at Whelan Park for one of Dublin's oldest football clubs. The surface provides an excellent balance of performance and longevity, allowing the club to use the field extensively and maximise its usage to the wider community.

"PST Sport looked after everything from design to completion. Even when we spotted opportunities to enhance the design during installation, PST Sport always had a practical, cost efficient solution with no fuss, and there was no attempt to overcharge for extras. Over the life of the installation I have come to implicitly trust PST Sport and have huge faith in their work. PST Sport were an excellent choice for us as a partner to develop the club's facilities. Their passion matched our own ambition to have the very best."

MARK CASLIN, DDSL SECRETARY, LARKVIEW BOYS FC

BARNET FC, THE HIVE INTERNATIONAL TRAINING CENTRE, LONDON FULL-SIZE 3G PITCH + 9 NO. 5-A-SIDE PITCHES

PST Sport was appointed principal contractor at Barnet FC to construct a 7,525 sq/m FIFA Quality Pro synthetic turf pitch along with 9 no. 5-a-side artificial grass playing surfaces. Supporting infrastructure included ball stop netting and floodlights. Works also incorporated drainage attenuation, pathways (both tarmac & artificial finishes), retaining wall, construction of bases for a new stand, groundsman sheds and power supply.

The site was in an EA flood reservoir with a brook running along one end which brought significant challenges. We designed the pitch factoring in the risk of flooding and ensuring the storage capacity of the project remained neutral post construction.

The chosen surface was SUPERB 45. This is a dense carpet with 400 micron thick fibres to control infill and give an enhanced player experience. From an aesthetic viewpoint, green PRO-gran performance infill was used. Sports Labs were engaged to test all stages of the subbase construction in terms of structural integrity, e-layer test, 3m straight edge and final FIFA Quality Pro field test.

"I met Colin Teahon, owner of PST Sport in 2019 and we discussed a large ATP project at The Hive London which is an Internationally renowned Football Training Centre and Stadium. After a lengthy tender process, PST emerged as the successful contractor."

The project included the regrading and fitting of a new carpet on an existing 3G pitch and the construction of another full-size pitch plus nine 5-a-side pitches. All pitches were to FIFA Quality Pro Certified Standard and the contract included planning assistance, design, and all ancillary works. The total contract was almost £2m and the works are almost complete and to an exceptionally high standard."

I was very impressed with the product and the service provided by Colin and PST so am now contracting them to build a similar facility on the same site but with more pitches overall."

Overall, my experience has been very positive."

**TONY KLEANTHOUS,
CHAIRMAN, BARNET FC**

ST FRANCIS FC, DUBLIN

Full-Size FIFA Quality Approved

In 2019, PST Sport were selected as the main contractor to deliver a world-class synthetic turf pitch for Dublin grassroots football club, St Francis FC at their home grounds, John Hyland Park in Baldonnell. The project saw the existing grass field replaced with a world-class 3G pitch. In 2023, we completed the construction of a 59 x 52m artificial grass training surface for the club. Full works.

FLINT TOWN UNITED FC, FLINT, WALES

7,800 sq/m FIFA Quality Pro Approved

PST Sport replaced the existing grass field at Essity Stadium with a state-of-the-art artificial grass pitch. Works included installing a new drainage system, stone subbase and dynamic stone layer. The chosen surface was our flagship Superb 45, a heavy weight premier football surface offering superior playing characteristics, installed onto a performance pad

VILLA FC, WATERFORD

7,100 sq/m FIFA Quality Approved

Full-size FIFA Quality field at Villa FC's home grounds, Connors Park in Waterford. This was quite a unique project; the pitch footprint was a reclaimed landfill site. Given the complexity of the site, PST Sport spent 2 years working with the club to deliver this world-class facility. Prior to works commencing we carried out compaction tests to establish ground strength. Given the nature of the site, there were considerable variances throughout.

A ground penetrative radon survey was carried out to establish all of the soft areas throughout the proposed pitch footprint. These were excavated and filled 12 months prior to the subbase being built. Further compaction tests were carried out on levelling each layer of stone. Villa FC opted for our flagship artificial grass, Superb 50, sat atop a preformed shock pad giving the highest possible performance for an artificial turf pitch.

MORPETH TOWN FC, ENGLAND

7,800 sq/m Artificial Grass Pitch

PST Sport took on a design and build role for the new artificial turf pitch at Morpeth Town FC's home grounds, Craik Park. The project included full groundworks and the installation of a new drainage system, stone base and dynamic stone layer as well as 1.2m high spectator fencing.

Prior to works commencing we carried out a complete soil and base survey to assess the ground underneath. This allowed us to design a stabilised

subbase to accommodate the new surface. Our design included a clean crushed stone base (30-40mm) 150mm thick base to maintain rain volume capacity in wet winter months. PST have experience in designing open stone bases for capacity and retention of rainwater.

The chosen surface: Superb 45 infilled with sand and Murfitts PRO-gran green SBR.

CLUB DES SPORTS, E ACTON, LONDON

9,000 sq/m FIFA Quality/World Rugby Approved

The exclusive Club Des Sports in West London has been one of PST Sport's most diverse projects to date. A design and build project spanning over 4 years, PST Sport has worked closely with our client at Club Des Sports to develop a state-of-the-art multi-sport facility to service schools sporting requirements during the day and clubs during evenings and weekends. We have designed and built over 20,000 sq/m of synthetic grass surfaces, catering for Rugby, Football, Tennis and Cricket. We have also constructed a 2-storey pavilion to host the various clubs safely.

Having been out to tender for a 9,000 sq/m synthetic grass pitch, I contracted the job to PST Sport for a number of reasons: technical knowledge, hands-on approach, can-do attitude and evident quality of product. The job has been delivered on time and on budget, without any issues whatsoever. The acid test of any contractor's performance is would I use them again? In this case, I will and I am.

DAN WHITE,
MANAGING DIRECTOR & OWNER,
CLUB DES SPORTS

**SHEFFIELD WEDNESDAY FC,
ENGLAND**

Full-Size FIFA Quality Pro Approved

The new floodlit pitch at Jubilee Sports & Social Club meets FIFA Quality Pro standards. We designed the subbase and drainage system to accommodate the new surfacing solution to deliver the most technologically advanced artificial turf pitch.

The chosen surface was Triplex 45, a premier monofilament artificial grass laid onto a preformed shock pad with high grade silica sand and a performance rubber infill. Triplex 45 uses 3 different shaped yarns, for better resilience, durability and softness. This enables the field to perform to FIFA standards and also creates a surface that can last in excess of 10 years.

I would like to place on record how professional the staff were from PST Sport from start to finish at our new facility. I would have no hesitation in recommending PST moving forward. We are extremely pleased with the new 3G pitch and also the after service that is provided by the team. To have a state-of-the-art facility like this connected to the club, a facility for all age groups to use on a day-to-day basis, will benefit the community and academy and play a key part in the development of the club's programmes going forward.

**MARCUS BRAMELD, HEAD OF COMMUNITY,
SHEFFIELD WEDNESDAY FC**

**BRADFORD PARK AVENUE FC,
ENGLAND**

8,000 sq/m FIFA Quality Pro Approved

PST Sport installed a full-size synthetic turf pitch at Horsfall Stadium. The chosen surface was Max BiPlex, a hybrid artificial grass designed by PST Sport's Managing Director, Colin Teahon and manufactured by CGrass. Our Max BiPlex 60 system installed at Bradford Park Avenue FC is a unique surface designed to meet FIFA Quality Pro and World Rugby standards.

Max BiPlex is a hybrid two-fibre product, extruded to 12,000 and 5,500 dtex respectively. Max BiPlex combines the Max monofilament yarn, made with C8 polymer, with a strengthened fibrillated yarn to create a unique surface. The result is the best possible pitch, combining football performance with safety and durability to meet the club's demands.

Bradford Park Avenue FC have invested in a brand new 3G pitch as a stadium pitch and this was completed over the summer by PST Sport. We are delighted with the playing surface and the work done to deliver the pitch by PST Sport.

**MARK LEADBEATER, CEO,
BRADFORD PARK AVENUE FC**

ST IVES TOWN FC, ENGLAND

8,000 sq/m FIFA Quality Pro Approved

PST Sport provided a complete design and build service for St Ives Town FC which saw the complete overhaul of the existing stadium pitch at Westwood Road with a brand new FIFA Quality Pro 8,000 sq/m artificial pitch. Using test results gained from an extensive site survey, a dynamic pitch subbase was designed using PST Base™ methodologies.

The surface is our Superb 50 artificial grass carpet on a high density performance shock pad, sat atop a complete drainage system and stone base. New perimeter fencing was installed and the lighting was upgraded to LED floodlights.

At the start of the process, we were very clear of what we wanted to achieve in terms of end product & how this project would really benefit the club & local community for many years to come. We wanted a real top quality, state-of-the-art, market leading surface, including shock pad, together with all associated works of the same high standard. Fast forward to the end of the project and we have exactly the new market-leading, top-quality, professional facility we envisaged, delivered by PST. Like ourselves, they really value a long-standing relationship and working partnership. We very much look forward to working with PST for many years to come.

GARY CLARKE, CLUB CHIRMAN, ST IVES TOWN FC

**HEMEL HEMPSTEAD TOWN FC,
ENGLAND**

7,900 sq/m FIFA Quality Pro Approved

PST Sport installed a full-size synthetic turf pitch at Hemel Hempstead Town FC's Vauxhall Road stadium. A further 1,700 sq/m of synthetic turf was used to re-turf the existing 6-a-side artificial surface making a total of 9,600 sq/m of turf supplied and laid. We designed the subbase and drainage system to accommodate the new surface to deliver the most technologically advanced artificial turf pitch.

Club Chairman, Dave Boggins chose our top of the range Superb 45, infilled with high grade silica sand and PRO-gran infill. The end result is a state-of-the-art artificial grass pitch at Hemel Hemstead Town FC where players of all ages can play at Vauxhall Road, rain or shine.

I am very pleased with PST Sport, the appointed contractor to carry out the works on this prestigious project for the club. The installation went very well and the pitch is playing perfectly. It's a marvellous job, I have had nothing but compliments from everybody that has played on the pitch. I look forward to working with PST Sport in the future on maintenance etc. Thank you for a beautiful job.

**DAVE BOGGINS, OWNER & CHAIRMAN,
HEMEL HEMPSTEAD TOWN FC**

HIGHVIEW ATHLETIC FC, KILKENNY

Full-Size FIFA Quality Approved

PST Sport replaced the existing grass pitch with a world-class artificial turf playing surface for Highview Athletic FC. We provided a complete turnkey solution. The club opted for our Superb 50 artificial turf, a real heavy weight premier football surface, on a high-density performance shock pad, sat atop a complete drainage system and stone base. Ancillaries included fencing, netting, floodlights, the install of a soak pit and a gravel footpath.

ST BRENDAN'S PARK FC, TRALEE

Full-Size FIFA Quality Approved

PST Sport worked with Tralee football club, St Brendan's Park FC to design and build a full-size floodlit artificial grass pitch at Christy Leahy Park. The chosen surface: shock pad and Superb 50 artificial turf on a dynamic base. Access to world-class sports facilities like these is integral to the health of any community. This was a dream the club had for many years and will take club facilities to the highest level.

MOYNE VILLA FC, CO. GALWAY

7,800 sq/m Artificial Grass Facility

7,000 sq/m artificial grass football pitch + 800 sq/m artificial grass training area. The project included full groundworks and drainage, kerbing, fencing, ball stop netting, carpet and shock pad installation, and two no. 12 person dugouts.

It was a pleasure working with PST Sport, the new pitch looks fantastic and thanks for your professionalism throughout. Send on any potential clients to me and I will happily steer them your way.

TOM WALSH, MANAGING DIRECTOR

★★★★★

CARRIGALINE UNITED AFC, CO. CORK

8,000 sq/m FIFA Quality Approved

The installation of a 2nd full-size all-weather pitch at Ballea Park was a major ambition for our club given the ever-increasing demands for pitch space from a growing membership. It was imperative that we got the best possible product at the best possible price. After extensively reviewing their previous projects, we satisfied ourselves that PST Sport were best placed to meet our needs. The work was conducted in a very professional manner. The new pitch has a real wow factor and is a fantastic asset for our community. We are very happy to recommend PST Sport.

**TIMOTHY MAWE, HONORARY TREASURER,
CARRIGALINE UNITED AFC**

★★★★★

ARKLOW TOWN FC, CO. WICKLOW

Full-Size FIFA Quality Approved

PST Sport completed a 7,400 sq/m pitch returfing project for Wicklow grassroots football club, Arklow Town FC. Works included the removal and safe disposal of the old carpet. Prior to works commencing a PST Base survey was carried out to assess the ground underneath. Once the old carpet was removed, any necessary base remedial works were carried out. The surface is our high performance 50mm Libra artificial turf.

BANDON AFC, CO. CORK

2,850 sq/m Artificial Grass Training Pitch

PST Sport constructed a 2,850 sq/m artificial grass training pitch for Cork club, Bandon AFC. The project included full groundworks with the installation of an enhanced drainage system and soakaway drains, the construction of a new stone base, followed by the install of shock pad and carpet (Libra 50). Ancillary works included a tarmac footpath, perimeter kerbing, and rollaway goals.

CHERRY ORCHARD FC, DUBLIN

6,350 sq/m FIFA Quality Approved

We can testify to PST's ability to provide a full turnkey solution from start to finish. Including all aspects of the project from above and below groundworks, fencing, netting, floodlights and a FIFA Certified all-weather playing surface. By partnering with PST we have been able to achieve our aim with the minimum of fuss. This is exemplified by PST's willingness to work with us and to find solutions to any problems that arose during the process. On the basis of our experience, I would strongly recommend PST to any prospective client where their capacity to deliver will satisfy the highest expectations.

TOM KENNEDY, CHAIRMAN

★★★★★

CAPPAGH PARK, GALWAY CITY

7,530 sq/m FIFA Quality Approved

Following a public procurement competition, PST Sport, after a full evaluation and pre-qualification process were chosen as the successful bidder to construct a state-of-the-art FIFA full-size synthetic soccer pitch for Galway City Council at Cappagh Park, Galway. PST Sport, in conjunction with our sports field consultants Sports Labs Ltd. UK, successfully delivered the project on schedule and within budget. The facility has been constructed to the highest standard. We have no hesitation to recommend PST Sport for any similar projects and have no doubt we will, I hope, work in a similar fashion on future projects.

**STEPHEN WALSH, SENIOR EXECUTIVE PARKS
SUPERINTENDENT, GALWAY CITY COUNCIL**

★★★★★

ARTIFICIAL GRASS PITCHES FOR GAA

PST Sport understands the key role played by synthetic turf pitches in the development of GAA today. We specialise in the design, planning, installation and maintenance of high-grade artificial grass GAA pitches. In recent years the GAA has seen a significant increase in the demand for high quality sports facilities as training and preparation for GAA, at all levels, continues to grow and evolve. GAA clubs of all sizes are now incorporating artificial pitches into their current and future development plans to meet this demand.

Our high performing artificial turf systems have been developed with input from Ireland's leading

GAA athletes to achieve the highest specifications required by the GAA. Our artificial grass pitches offer an enhanced player experience allowing club members, from underage level to seniors, to train regardless of the weather or ground conditions.

Our GAA projects range from indoor and outdoor training areas to full-size GAA pitches for the likes of St Vincent's GAA, Derry GAA's Owenbeg Centre of Excellence and Le Chéile Secondary School in Tyrrelstown, County Dublin.

ST VINCENTS GAA, CO. DUBLIN

13,000 sq/m GAA Approved

In January 2019, PST Sport completed the installation of a world-class 13,000 sq/m 3G GAA pitch at St Vincent's GAA in Dublin. The three times All Ireland title holders wanted to replace the existing grass playing surface adjacent to the club's senior pitch. St Vincent's requested a state-of-the-art artificial grass pitch that would meet

the high-performance requirements of the GAA, and PST Sport delivered. The project included full groundworks, carpet and shock pad to meet GAA specification. Our Superb 60 carpet installed here is the very latest in synthetic turf technology. Below ground works are equally as important – get this stage right and maximise the lifespan of your pitch.

SARFIELD'S HURLING CLUB, CO. CORK

4,500 sq/m GAA Approved

PST Sport delivered a state-of-the-art artificial grass facility to Cork hurling club, Sarsfields GAA. The project saw the existing all-weather pitch resurfaced with 4,500 sq/m Superb high performance artificial grass carpet. Ancillary works included new fencing and kerbing as well as repairs to the existing netting.

A second part of the project was the installation of a hurling wall positioned at the end of the pitch and the construction of a 570 sq/m floodlit hurling skills area, fully carpeted and enclosed. Works included drainage and stone base, carpet installation, kerbing, fencing and netting.

DONAGHMORE ASHBOURNE GAA, CO. MEATH
.....

5,400 sq/m GAA Approved

In February 2023, PST Sport completed the construction of a 90 x 60m artificial grass GAA pitch for Meath club, Donaghmore Ashbourne GAA. The club has grown significantly in recent years and this new facility will help the club cater for growing members across all age groups in a thriving local community.

Prior to works commencing, PST carried out a complete site survey to assess the ground underneath. This allowed us to work together with our client to custom design a subbase and drainage system to accommodate the proposed new surfacing solution to deliver the most technologically advanced artificial turf pitch.

Key elements of the project included all civils including the install of an enhanced drainage system, 2.4m fencing, 2.6m netting, foundations for future ball-wall, foundations for floodlights, and the installation of our 60mm Pride carpet over prefabricated shock pad.

A facility like this is such an invaluable asset for any club. As well as providing a consistent, safe and reliable playing surface, the world-class 3G pitch will replicate the bounce and performance of a well maintained natural grass pitch. Not only that, the much needed all year-round facility will allow teams of all ages to participate, play and train all year, regardless of weather.

BEAUFORT GAA, CO. KERRY
.....

4,350 sq/m GAA Approved

We completed an 87m x 50m artificial grass GAA pitch for County Kerry club, Beaufort GAA. Key project elements included full groundworks + the install of an enhanced drainage system, perimeter kerbing, 2.4m high fencing and 2.6m high netting. The chosen surface was our Pride 60 carpet over preformed shock pad.

LIXNAW GAA, CO. KERRY
.....

2,700 sq/m GAA Approved

PST Sport was delighted to work with North Kerry hurling club, Lixnaw GAA on the design and construction of a 2,700 sq/m floodlit artificial grass training surface at their home grounds, Hermitage Park.

Key elements included the installation of a ball wall, sports netting, fencing, lighting and a concrete footpath. In terms of surface, Lixnaw GAA opted for our Pride 60 artificial grass laid over preformed shock pad with sand and a performance layer of SBR. The result is an exceptional playing surface.

TURLOUGHMORE GAA, CO. GALWAY
.....

2,100 sq/m GAA Approved

PST Sport completed an artificial grass training area for Galway club, Turloughmore GAA. The project included all works below ground, high performance Superb artificial turf and shock pad installation, ball wall, fencing, sports netting, perimeter kerbing and floodlights.

LOUGHMORE CASTLEINEY GAA, CO. TIPPERARY

2,100 sq/m GAA Approved

PST Sport completed a 90m x 45m 3G pitch including PST Base site survey, groundworks and drainage, perimeter kerbing, sports fencing, carpet and shock pad installation, netting and light ducting for Loughmore Castleiney GAA. The chosen surface: Superb EX260 over pad. Made from a combination of two yarns, the main fibre is the Superb yarn

with its strong diamond shape, that balances durability and resilience with a player friendly soft feel. The longer Superb fibres are supported by a 'thatch' yarn which acts like the roots of real grass and holds the infill layer at the base of the turf providing a superior player experience.

FINGALLIANS GAA, SWORDS, CO. DUBLIN

2,300 sq/m GAA Approved

115m x 20m artificial grass training area for Fingallians GAA in Swords, Co. Dublin. The project included full groundworks and drainage, fencing and netting. The chosen surface was our high performance Superb artificial turf laid over 20mm shock pad.

KILLYGARRY GAA, CO. CAVAN

1,250 sq/m Indoor Artificial Grass Pitch

We completed a 50 x 25m indoor pitch for Cavan club, Killygarry GAA. More and more clubs are reaping the benefits of PST Sport's highly durable synthetic turf indoor training pitches. These state-of-the-art facilities allow clubs to focus on training and development all year, regardless of the weather, on a consistent world-class surface. Our indoor pitches are designed for high performance and heavy use. We can help you transform underused indoor sports halls and old tennis courts into your club's biggest training asset.

ST JUDES GAA, CO. DUBLIN

GAA Approved Artificial Grass Training Facility

In 2021, PST Sport completed a 330 sq/m artificial grass training area for Dublin GAA club, St Jude's. Key elements included full groundworks with and the installation of an enhanced drainage system and construction of a stone base, perimeter kerbing, fencing, netting, floodlights and a concrete ramp.

KILDALKEY GAA, CO. MEATH

900 sq/m GAA Approved

State-of-the-art 900 sq/m artificial turf GAA training pitch including all subbase works, hurling wall, lighting and fencing at Kildalkey GAA in Co. Meath. This fantastic facility has proven to be an invaluable asset to the club allowing games to be played, even when their playing pitches are closed. This in turn brings a huge benefit to all sections of the club, and in particular the juvenile teams.

SMITH O'BRIENS GAA, CO. CLARE

Indoor Artificial Grass Training Facility

State-of-the-art 600 sq/m (20 x 30m) indoor artificial grass training pitch. The chosen surface was our flagship Superb artificial grass laid over preformed pad. The surface is extremely durable, resilient, and soft to touch offering a better grip and a smoother playing surface. Ancillaries included the supply and install of netting as well as retractable juvenile GAA goal posts.

HIGH PERFORMANCE ARTIFICIAL TURF PITCHES FOR RUGBY

To meet the demands of rugby, a pitch needs to be strong, durable, resilient, safe and player friendly. PST Sport's artificial grass rugby pitches guarantee a year-round facility that allows rugby clubs and schools to continually develop their teams across all levels and ultimately, on-the-field success. We provide a tailor-made solution from design and planning, pitch construction and testing, through to handover and maintenance to deliver a world-class rugby facility.

MUNSTER RUGBY MUSGRAVE PARK, CORK

10,500 sq/m **World Rugby Approved**

PST Sport's Superb 60 installed at Musgrave Park is the very latest in synthetic turf technology; it is the first of its kind World Rugby Approved pitch. The surface is extremely durable, resilient, soft to touch, controls infill splash and ultimately designed with maximum player safety in mind. While the pitch surface is unique, below the turf is equally important and PST Sport have pioneered a new dynamic pitch subbase and irrigation system ensuring maximum longevity and stability of the pitch.

To meet the vision of Munster Rugby the pitch had to be the very best. With two years of design works coming to fruition in 2018, our Munster Rugby pitch is like no other in terms of its make-up. This new state-of-the-art pitch will allow Munster players of all ages to play on the same surface as their heroes, year-round, whatever the weather.

COLIN TEAHON, MANAGING DIRECTOR, PST SPORT

After careful consideration, Munster Rugby decided in early 2018 to convert the natural grass pitch at Musgrave Park to an artificial grass surface. This was a huge decision for the province and choosing the right company to carry out the project was critical. After a competitive tender process where World Rugby Approved consultants were engaged to assess product quality, PST Sport came out on top.

Our experience with PST has been superb – they are definitely the best contractor we have dealt with in Musgrave Park. Nothing has been an issue and they have hit every deadline and promise.

PST Sport, along with their manufacturing partner, CCGrass designed a bespoke artificial grass product specifically for Munster Rugby. The feedback from both professional and amateur players alike has been fantastic. We would absolutely recommend PST Sport for any club or school considering installing an artificial grass pitch.

**PHILIP QUINN,
HEAD OF FINANCE & OPERATIONS,
MUNSTER RUGBY**

MULLINGAR RFC, CO. WESTMEATH

8,625 sq/m World Rugby Approved Pitch & Training Pitch

PST Sport completed a World Rugby Approved artificial grass facility for Westmeath grassroots rugby club, Mullingar RFC. This extensive project included full-size and training pitches including groundworks, shock pad, 60mm carpet and fencing. Such was the quality of the surface it has also met the requirements of other sports governing bodies. The artificial grass/shock pad combination used provides optimal energy restitution. Feedback on the surface was hugely positive from the men's Irish Rugby team who camped there during the 2016 Six Nations.

“After a competitive tender process among 8 companies a detailed post tender analysis was conducted. PST Sport emerged as the successful contractor and we are delighted that decision was reached. PST Sport delivered a first-class installation on time and within budget and demonstrated excellent technical ability. Feedback from players and coaches has been impressive. The Irish Rugby team trained on the pitch for the week prior to the Ireland v England Six Nations match in 2016. Several players commented that it was the best artificial grass surface they had played on and Joe Schmidt compared the pitch to the Twickenham surface. I would highly recommend Colin and his team to any organisation looking to install an artificial grass facility.”

**BRENDAN LEAHY, PROJECT MANAGER,
MULLINGAR RFC**

CLONGOWES COLLEGE, CO. KILDARE

9,000 sq/m World Rugby Approved

“Not only were PST Sport price competitive, they also offered a value-added service incorporating upgrades to our existing floodlight system and a higher than standard specification carpet. We are delighted with the outcome. I would highly recommend PST Sport as a professional and knowledgeable partner with the capacity to deliver a project on time and to budget with very little fuss.”

**CHRIS LUMB, HEADMASTER,
CLONGOWES WOOD COLLEGE**

LONGFORD RFC, CO. LONGFORD

8,500 sq/m World Rugby/FIFA Quality Approved.

PST Sport was appointed principal contractor for the construction of a full-size artificial grass rugby pitch at Longford Rugby Club. We provided a complete turnkey solution including all civils, fencing, netting, floodlights and Superb hybrid

artificial turf laid over shock pad, delivering the best possible playing surface. The new facility has been tested to World Rugby and FIFA Quality standards and has proven to be a massive hit for the club and the entire community

CLONMEL HIGH SCHOOL, CO. TIPPERARY

8,750 sq/m World Rugby Approved

Clonmel High School chose our Max 60 artificial turf on a performance pad to provide a top-level rugby system. Max 60 is extremely durable, incredibly resilient and designed to ensure maximum player safety and give a better rugby performance. The pitch can be played on constantly and drains much faster than natural turf.

WORLD-CLASS ARTIFICIAL TURF HOCKEY FIELDS

Artificial grass pitches have become almost essential in the game of hockey. Most international fixtures and club matches are now played on synthetic surfaces. PST Sport's artificial grass hockey fields are fast and consistent, designed specifically for skilful hockey, offering improved player safety and optimal playing characteristics.

In partnership with CCGrass, an FIH Preferred Hockey Producer, we launched the FastPro series with multiple systems tested and approved to FIH standards. Featuring hard wearing, curly PE fibres, FastPro 18 is dressed with selected small, rounded, clean sand, to provide a stable, attractive and long lasting hockey surface offering exceptional ball speed and uniformity as well as enhanced durability. The sand layer supports and strengthens the base of the fibres, but no sand is visible on the surface.

- ✓ 100% PE curly monofilament
- ✓ Player friendly with unsurpassed comfort
- ✓ Extreme UV stability and durability
- ✓ Optimum ball/surface interaction
- ✓ Dense stitch for compact appearance
- ✓ Smooth surface for great playability
- ✓ Aesthetic colour innovation

When installing an artificial grass hockey pitch, base preparation plays a pivotal role. The nature of the sport means that skilful game play is heavily reliant on surface conditions.

The surface has to be fast, flat and predictable to enable play at high speed and at a top level – a slow pitch can hamper game play considerably. With our vast experience in civil engineering and ground preparation works we can manage the entire project from consultation right through to professional maintenance.

“ To have the ability to “see” what is under an old pitch gives PST Sport certainty in design and allows us to work closely with our clients to deliver cost certainty where previously there was risk. PST Base gives both PST Sport and our clients confidence in project design and cost. ”

COLIN TEAHON, MD, PST SPORT

MIDLETON COLLEGE, CO. CORK

6,300 sq/m Sand-Dressed Hockey Field

FastPro 18 playing surface installed onto existing shock pad at Middleton College in Co. Cork. The new high performance sanddressed surface is ideal for fast paced hockey resulting in improved ball control and quicker passes.

SULLIVAN UPPER HIGH SCHOOL

6,300 sq/m Sand-Dressed Hockey Field

PST Sport installed a world-class hockey field at Belfast school, Sullivan Upper High School. The installation of a hockey field requires a highly skilled, experienced and dedicated team, qualities that PST Sport have proudly become renowned for.

REBUILDING A 20-YEAR-OLD SUBSIDED HOCKEY PITCH IN GRAVESHAM, KENT

PST Sport rebuilt a subsided 20-year old hockey pitch (5,800 sq/m) for **Gravesham Sports Trust** in Kent. The pitch had become almost too dangerous for use. Underneath the surface there were significant areas of subsidence and pitch deformation and they had struggled for some time to find a solution.

A complete PST Base site survey was carried out. We scanned the entire surface to determine how the pitch base was constructed and using the results we were able to formulate a cost-effective design to remedy the subbase and provide a long-lasting pitch base for our client.

“ From day one of the project I cannot fault PST Sport for their enthusiasm, technical knowledge and commitment. The innovative ground penetrating survey gave myself and my client surety over our budget and allowed us to pre-plan remedial works thus reducing the programme. PST Sport's attention to detail ensured a smooth and quality installation and has resulted in a top class playing surface ”

that without exception has been positivity received by players. I would not hesitate in recommending PST Sport for future installations.

**SUE JONES, PROJECT MANAGER,
GRAVESHAM SPIRITS TRUST**

ARTIFICIAL GRASS PITCHES DESIGNED SPECIFICALLY FOR SCHOOLS

An artificial grass pitch is a great way to optimise any available space your school may have. PST Sport know and understand the positive impact an artificial grass pitch can have on any school in terms of lower maintenance and longer playing hours. We can install an artificial grass playing surface over any size area, depending on the outside space your school has available, transforming underutilised muddy pitches and neglected tarmac courts to something your school can be very proud of.

With countless success stories across Ireland and the UK, PST Sport is a trusted brand in the educational sector. We take a practical approach looking at important factors such as; *what space is available, what sports are likely to be played, is planning permission required, is the facility to be rented after school hours, can the project be built in phases*, and so on. Over 12 years of experience and knowledge allow us to tailor a package that will meet your school's needs and budget.

POBALSCOIL NA TRIONÓIDE, YOUGHAL, CO. CORK

In 2022, PST Sport completed the construction of a state-of-the-art 5,000 sq/m floodlit artificial grass pitch for Pobalscoil Na Trionóide in Youghal. The new facility gives all-year-round access to training for over 800 pupils. These kinds of sports facilities make a real difference to the amount of time students get to play and train outdoors. The project included full groundworks and drainage, perimeter kerbing, fencing, netting and the installation of lighting. The chosen surface was our Pride 50 artificial turf laid onto a preformed shock pad with sand and a performance layer of SBR. We also completed 2 no. smaller pitches at the school: 1) 1,020 sq/m 3G surface; 2) 1,020 sq/m MUGA (multi-use-games-area).

CARRIG NS, NENAGH, CO. TIPPERARY

PST Sport completed the installation of a 1,150 sq/m artificial pitch at Carrig National School, just outside Nenagh in County Tipperary. Project works for the 37m x 31m pitch included full groundworks and drainage, the installation of 60mm artificial grass carpet, sports fencing, 4.1m high ball stop netting and perimeter kerbing.

The installation of our astro turf pitch coincided with a major building project at the school. Therefore, co-operation between the builder and PST Sport was very important. The time frame was dictated very much by the progress of the building works and PST Sport were very flexible to fit in with that time frame, and even though the building works delayed them they still managed to get everything done for September 1st.

PST Sport invested a lot time liaising with myself and the builder to ensure that we had a perfect

product. Cost was a huge consideration as this pitch was completely funded by fundraising activities by parents and donations from the community. Every cent counted and I am confident we got a top quality pitch at a keen price. For me as principal of the school it was easy to work with PST Sport as they are very competent and professional and I would highly recommend them.

**MÁIRÉAD O'HALLORAN, PRINCIPAL
CARRIG NATIONAL SCHOOL**

**ST PATRICK'S BOYS NS,
RATHANGAN,
CO. KILDARE**
.....

PST Sport delivered a 4,700 sq/m state-of-the-art artificial grass pitch to St Pats BNS in Rathangan. The project scope included full groundworks, installation of an enhanced drainage system and stone base, perimeter kerbing, fencing, netting, and the install of high performance 50mm Pride artificial grass carpet over shock pad. As well as lower maintenance costs and extended usage, our artificial grass pitches offer the opportunity to generate additional revenue by hiring out your school's all-weather facility to the local community outside of school hours.

**SCOIL BHRÍDE TUAM
CO. GALWAY**
.....
2,850 sq/m 3G Pitch

Scoil Bhríde's new pitch will benefit the school greatly and opens up lots of opportunities for students to train outside in a clean and safe environment.

“ We are delighted with our new pitch. The standard of finish by PST Sport is outstanding. They were extremely professional and very easy to work with throughout the entire project and delivered exactly what they said they would. Many thanks for the top-class job. We are very proud of our new pitch and we would recommend PST Sport highly to any school considering building a new artificial grass pitch. **”**

GEARÓID LEEN, PRINCIPAL, SCOIL BHRIDE TUAM

FIRIES NS, FIRIES, CO. KERRY
.....

PST Sport designed and built a 2,280 sq/m 3G playing surface for Firies NS. The project included full groundworks, retaining wall, fencing, netting, LED floodlights, ball stop netting and shock pad.

“ We are thrilled with our state-of-the-art pitch. Enormous thanks to the PST Sport Dream Team for their high level of professionalism, efficiency and wonderful support. Most of all, thank you for delivering the Rolls Royce model of all-weather pitches on time! **”**

CLAIRE DOYLE, PRINCIPAL, FIRIES NATIONAL SCHOOL

BURNCOURT NS, CAHIR, CO. TIPPERARY
.....

PST Sport were delighted to hand over a 1,375 sq/m artificial grass pitch to Burncourt NS. The project included full groundworks and drainage, perimeter kerbing, sports fencing, floodlights and the install of our Pride 50 artificial grass over shock pad to deliver this world-class facility.

“ From the design process to the completion of the works we have found PST Sport to be fantastic to deal with. In under 8 weeks the whole job has been completed to a high standard, without any disruption to the day to day running of the school while they have been on site. The whole team has been great to deal with, once the school appointed PST the project has been managed by PST without any assistance from the school needed. Each week the project manager sent an update with photos to keep us informed about the progress made to date and the plan for the upcoming week. I would not hesitate in recommending PST to any other schools. **”**
