WHO WE ARE

PST Sport is a recognised leader in artificial grass pitch construction, led by a highly skilled senior management team with extensive experience across the UK and Ireland. Our portfolio includes multiple full-size pitches tested and approved to **FIFA, World Rugby, GAA, and FIH** standards, as well as many training pitches, reflecting our commitment to quality and excellence.

As a **Design & Build** specialist contractor, we provide a complete turnkey solution for any pitch development project, both green field sites and resurfacing older pitches. This includes the subbase, playing surface and supporting infrastructure (*fencing, lighting, access, footpaths, car parks, and any additional building works*) for all sporting codes.

Innovation has been a huge factor in PST Sport's success to date. We are pioneers in pitch base construction, with continuous in-house Research & Development focusing on perfecting base designs to ensure maximum longevity and stability of the pitch.

PST Sport has a proven track record of delivering world-class sports facilities. Our artificial turf systems lead the market with advanced fibre technology and extended product warranties. Designed for durability, resilience, safety, and playability, our surfaces set the standard for artificial grass sports facilities.

MUNSTER RUGBY, VIRGIN MEDIA PARK, CORK, IRELAND

.....
10,500 sq/m **World Rugby** Approved

CHELSEA FC COBHAM TRAINING GROUND, LONDON

9,600 sq/m FIFA Quality PRO Approved

COMPREHENSIVE PITCH CONSTRUCTION SOLUTIONS

With in-house expertise in all aspects of pitch construction we offer our clients a tailor-made solution unlike any other available in the market. Each pitch is customised to meet your unique project requirements, ensuring maximum value for money and return on investment. We have an experienced in-house design-led team with a strong focus on pre-construction. Our clients are guaranteed a comprehensive and fully managed turnkey service. Design, Commercial, Risk and Schedule Management are fully leveraged by PST Sport ensuring excellence in every project delivery.

OUR SERVICES

- ✓ Design & Planning
- ✓ Funding
- ✓ Subbase Construction
- ✓ Fencing, Netting & Floodlights Etc.
- ✓ Shockpad & Artificial Grass
- ✓ Testing Throughout Construction
- ✓ Pitch Maintenance

WHY CHOOSE PST SPORT?

DESIGN & BUILD SPECIALIST CONTRACTOR

We manage the entire project from concept to completion, supported with a professional indemnity insurance policy protecting your investment, now and in the future. We tailor our pitch designs to meet each client's specific needs, ensuring optimal value & ROI.

THE MOST ADVANCED ARTIFICIAL TURF SYSTEMS

Through our partnerships with **FIFA & World Rugby** Preferred Producers, CCGrass and Saltex, we deliver the most advanced artificial turf systems that meet the highest international standards.

COMPLETE TURNKEY SOLUTION

PST Sport is a one-stop shop for any club, school or sporting organisation considering building a new ATP or resurfacing an existing one. We provide a comprehensive range of services, including planning advice, design, state-of-the-art pitch construction, project management, testing throughout construction, and pitch maintenance.

TESTING THROUGHOUT CONSTRUCTION

While testing is mandatory for projects requiring sports governing body accreditation (**FIFA/WR/FIH**), we voluntarily test all new build pitches throughout construction. Each measurable element is independently tested, forming a key part of PST Sport's *Quality Management System*.

SUBBASE CONSTRUCTION

We build pitches from the base up, with below ground works a critical component of a well-designed pitch. Using innovative ground testing methods, we design pitch subbases that ensure a safe, durable playing surface. Get this stage right and extend the lifespan of your pitch.

QUALITY, HEALTH & SAFETY

Quality is central to PST Sport's operations. Guided by the principle "do it once, do it right" every aspect of pitch construction is carefully monitored in line with **ISO 9001** and **ISO 45001** standards.

HIGHLY SKILLED TEAM

With in-house expertise across each facet of pitch construction, our highly skilled team have the experience and technical ability to deliver a world-class artificial grass pitch.

WARRANTIES

PST Sport provide the most comprehensive warranties in the artificial grass pitch industry both in terms of manufacturer and PST Sport's workmanship warranty.

PST BASE™: BUILDING BETTER PITCH BASES

What Makes a Great Pitch?

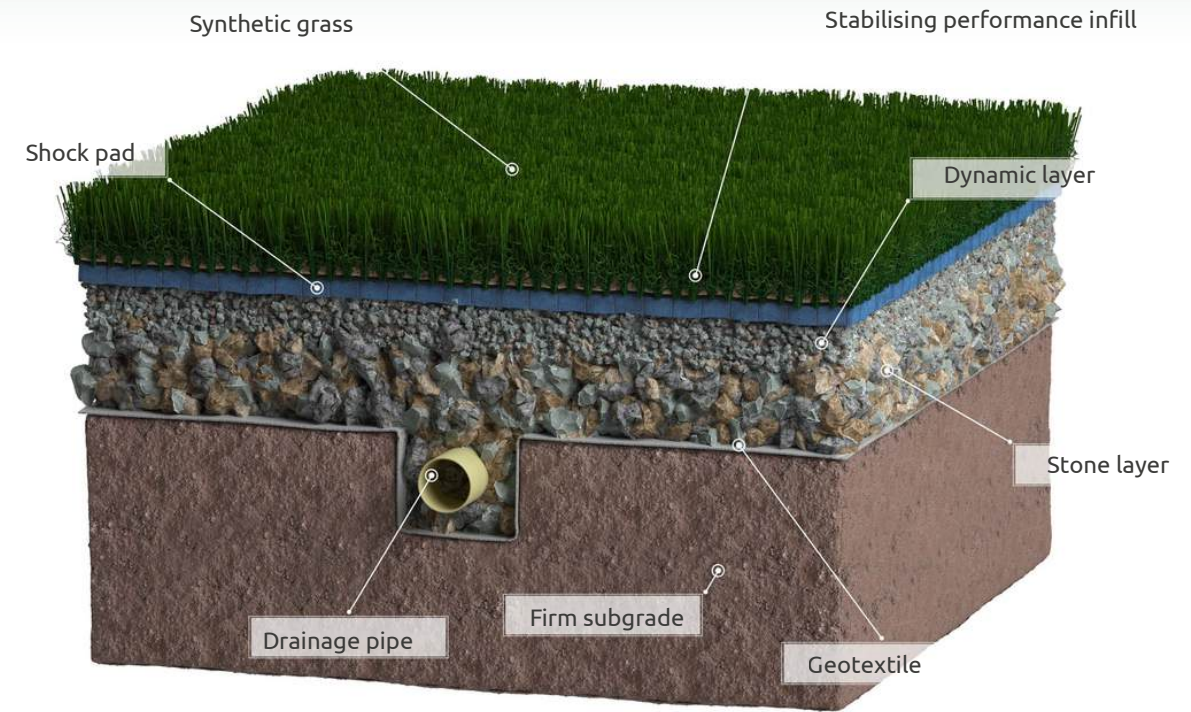

The best artificial grass pitches are designed to optimise performance, enhance speed and agility, and prioritise player safety. Proper drainage is essential for all-weather play, while a consistent surface and effective shock absorption help minimise the risk of injuries.

PST Sport's expertise in artificial grass pitch construction means every project is tailored to deliver outstanding performance. We know and understand that the works below ground are a critical component of a well-designed artificial grass pitch. A well-built base provides a stable,

durable, and safe playing surface, maximising the lifespan and performance of the pitch.

Innovation & Research 'Key' to Our Success

With a progressive attitude towards innovation, Research & Development is at the cornerstone of our success to date. PST Sport has been at the forefront of constructing unbound dynamic pitch bases for over a decade. With extensive experience and expertise, we have perfected these bases to enhance pitch performance and longevity, consistently meeting the highest standards in sports surface technology.

Typical PST Sport pitch base shown above

The project below ground is just as important as what goes on top. Get this stage right and the lifespan of your pitch.

ST IVEST TOWN FC

8,000 sq/m FIFA Quality Pro Approved

We provided a complete design and build service for St Ives Town FC which saw the overhaul of the existing stadium pitch at Westwood Road with a brand new FIFA Quality Pro ATP. Using test results gained from an extensive site survey, a dynamic pitch subbase with enhanced drainage was designed using PST Base™ methodologies. The chosen surface was our SUPERB 50 turf on a high density performance shock pad. New perimeter fencing was installed and the lighting was upgraded to LED floodlights.

“ At the start of the process we were very clear of what we wanted to achieve in terms of end product and how this project would really benefit the club and local community for many years to come. We wanted a top quality, state-of-the-art, market leading surface, including shock pad, together with all associated works of the same high standard. Fast forward to the end of the project and we have exactly the new market-leading, top-quality, professional facility we envisaged, delivered by PST Sport. Like ourselves, they really value a long-standing relationship and working partnership. We very much look forward to working with PST for many years to come.

GARY CLARKE, CLUB CHIRMAN, ST IVES TOWN FC

FOOTBALL FOUNDATION FRAMEWORK

PST Sport has been selected as an exclusive contracting partner for one of the six artificial grass pitch providers on the **Football Foundation's Artificial Grass Pitch Framework**. This recognition highlights our commitment to excellence in artificial turf pitch construction and reinforces our position as leaders in the industry.

We are incredibly proud to have successfully introduced our cutting-edge 'unbound' pitch bases within the Framework and completed several state-of-the-art pitches tested to **FIFA Quality** Standards.

SHEFFIELD WEDNESDAY FC

Full-size **FIFA Quality** Approved

PST Sport constructed a floodlit FIFA Quality pitch at Sheffield Wednesday's Jubilee Sports & Social Club. We designed the subbase and drainage system to accommodate the new TriPlex 45 surface to deliver the most technologically advanced artificial turf pitch.

TriPlex 45 is a premier monofilament artificial grass using 3 different shaped yarns, for better resilience, durability and softness. This enables the field to perform to FIFA standards and also creates a surface that can last in excess of 10 years.

I would like to place on record how professional the staff were from PST Sport, from start to finish at our new facility. I would have no hesitation in recommending PST moving forward. We are extremely pleased with the new 3G pitch and also the after service provided by the team. To have a state-of-the-art facility like this connected to the club, a facility for all age groups to use on a day-to-day basis, will benefit the community and academy and play a key part in the development of the club's programmes going forward."

MARCUS BRAMELD, HEAD OF COMMUNITY, SHEFFIELD WEDNESDAY FC

HUMBERSTON ACADEMY, GRIMSBY

Full-size **FIFA Quality** Approved

PST Sport delivered a state-of-the-art floodlit artificial grass pitch at Humberston Academy in Grimsby. Key project elements included all civils, perimeter kerbing, fencing (various heights), sports netting, trek boards and 6 no. 15m floodlights.

The pitch features a dynamic base, with an unbound stone foundation to dissipate energy, mimicking the feel of natural turf. Its customised depth and excellent drainage make it ideal for football and rugby systems. The base is designed to be low-maintenance and long-lasting, offering a lifespan 40+ years with minimal upkeep.

The chosen surface, TriPlex 45, laid over a shock pad to create a high-performance, durable playing surface. Designed for long-term use, it ensures excellent playability, player comfort, and resilience, making it an ideal choice for both football and rugby.

WORLD-CLASS TURF SOLUTIONS

PST Sport is committed to delivering the most advanced artificial turf systems through our partnerships with two FIFA & World Rugby Preferred Producers, **CCGrass** & **Saltex**. These collaborations allow us to offer cutting-edge turf solutions, meeting the highest international standards.

Our pitches are infilled with high-grade silica sand and performance SBR. Additionally, we prioritise sustainability by offering innovative turf systems with natural infill options, reducing environmental impact while maintaining exceptional playability.

Introducing CCGrass

PST Sport and CCGrass have a long standing and successful partnership since 2012. CCGrass is the world's leading artificial turf manufacturer, operating the largest production facility globally. It is also one of only **four** producers worldwide with "**Preferred Producer**" status for **World Rugby, FIFA, and FIH**.

LARKHALL ATHLETIC FC

Full-size **FIFA Quality Pro** Approved

We constructed a 7,400 sq/m FIFA Quality Pro ATP at Larkhall Athletic FC's Securitاس Stadium, replacing the existing grass field. The upgrade included a new drainage system, stone subbase, and dynamic stone layer. The chosen TriPlex 45 surface laid over preformed shock pad provides a good balance of performance and longevity, which allows the club to use the field extensively, maximising its usage to the wider community. Additional works included kerbing, spectator fencing, a 1.5m wide tarmac footpath on three sides of the pitch, and retaining walls. PST Sport has a proven track record of delivering exceptional sports facilities, and this new pitch at Larkhall Athletic Football Club is no exception.

OXFORD CITY FOOTBALL CLUB

Full-size **FIFA Quality** Approved

We replaced the existing artificial grass pitch at RAW Charging Stadium with a **FIFA Quality TriPlex 45** surface. The pitch is designed to:

- ✔ Offer a fast, safe and realistic football surface;
- ✔ Promote advanced skills;
- ✔ Be consistent whatever the weather;
- ✔ Provide players with the best playing experience.

MORPETH TOWN FC

7,800 sq/m Artificial Grass Pitch

PST Sport took on a design & build role for this project which included full groundworks, enhanced drainage system, and a dynamic stone base. Prior to works commencing we carried out a complete soil and base survey to assess the ground underneath. This allowed us to design a stabilised subbase to accommodate the new surface; SUPERB 45 infilled with sand and Murfitts PRO-gran green SBR. We also installed 1.2m high fencing.

ACCREDITATIONS, PARTNERSHIPS & MEMBERSHIPS

QUALITY, HEALTH & SAFETY

PST Sport has robust Quality and Health & Safety Management Systems built on the premise of 'do it once, do it right' and is operated across all PST projects and offices. We take pride in our approach to Quality Management and our documented processes help us to ensure that all projects are delivered to the highest specification, both on time and within budget. PST Sport has been awarded the following certifications demonstrating our compliance to the the highest Quality and Health & Safety Standards.

- ISO 9001 for Quality Standards
- ISO 45001 for Health & Safety Standards

SAPCA

PST Sport is a member of SAPCA, the UK trade association for the Sports and Play Construction Industry.

CONSTRUCTIONLINE

PST Sport is a Gold Member of Constructionline, the UK's largest procurement and supply chain management service for the construction industry.

SAFE CONTRACTOR

PST Sport has been awarded Safe Contractor Accreditation.

SSIP

PST Sport is an SSIP Registered Member.

SOCIAL VALUE

PST Sport has been awarded the Social Value Management Certificate, an organisational accreditation recognising our commitment to delivering principled social value in every aspect of our work.

PARTNERSHIPS

PST Sport has a long-standing commitment to supporting grassroots sport, recognising its unique ability to unite communities. We are proud to partner with the Southern Football League, Oxford City FC, Munster Senior League, Dublin District Schoolboys' League (DDSL), and Austin Stacks GAA. These partnerships reflect our dedication to strengthening grassroots sport and providing world-class facilities for clubs and communities.

MIDLETON COLLEGE, CO. CORK, IRELAND

.....
6,300 sq/m Sand-Dressed Field

FastPro 18 sand-dressed hockey surface installed at Midleton College in Cork. The project involved safely removing the old carpet and installing our high-performance sand-dressed FastPro surface. Engineered for fast-paced hockey, it improves ball control and allows for quicker, more precise passing.

CLUB DES SPORTS, E ACTON, LONDON

9,000 sq/m FIFA Quality/World Rugby Approved

The exclusive Club Des Sports in West London has been one of PST Sport's most diverse projects to date. A design and build project spanning over 4 years, we worked closely with Club Des Sports to develop a state-of-the-art multi-sport facility. We have designed and built over 20,000 sq/m of artificial grass surfaces, catering for Rugby, Football, Tennis and Cricket. We also constructed a 2-storey pavilion.

“ Having been out to tender for a 9,000 sq/m synthetic grass pitch, I contracted the job to PST Sport for a number of reasons: technical knowledge, hands-on approach, can-do attitude and evident quality of product. The job has been delivered on time and on budget, without any issues whatsoever. The acid test of any contractor's performance is would I use them again? In this case, I will and I am.

DAN WHITE, MANAGING DIRECTOR & OWNER, CLUB DES SPORTS

BEDFORD TOWN FC

7,800 sq/m FIFA Quality Pro Approved

We replaced the existing grass field at Eyrie Stadium with a world-class FIFA Quality Pro ATP. Additional works included perimeter kerbing, fencing, and a 2-meter-wide tarmac footpath around the pitch.

“ I met Colin Teahon, Managing Director of PST Sport. We met 5 different companies who provide new artificial surfaces in the UK, and I will honestly say he 100% was the best party to deal with - his knowledge and integrity is unquestionable. No pressure sales and he certainly delivered to the timescales that we wished for. The quality workmanship and the knowledge of his team to deliver such a magnificent 'state-of-the-art-facility' is second to none. The pitch is looking fantastic and everyone that has been down to the ground has said the same thing. The customer service and workmanship has been excellent. From start to finish, we have been very impressed, and we will always recommend this company. Many thanks for all your help. We are delighted with the pitch PST have provided.

JON TAYLOR, OWNER & DIRECTOR, BEDFORD TOWN FC

WHITWORTH PARK ACADEMY, DURHAM

106m x 70m FIFA Quality Approved

This project was supported by the Football Foundation

BARNET FC, THE HIVE, LONDON

FIFA Quality Pro ATP + 9 no. 5-a-side pitches

The site, located in an EA flood reservoir, posed significant challenges. Our pitch design accounted for flood risk, maintaining neutral storage capacity post-construction. The surface: SUPERB 45 with PRO-gran performance infill. Supporting infrastructure: netting, floodlights, tarmac & artificial pathways, a retaining wall, and bases for a new stand and groundsman shed.

BRADFORD PARK AVENUE FC

8,000 sq/m FIFA Quality Pro Approved

PST Sport installed a full-size artificial grass pitch at Bradford Park Avenue's Horsfall Stadium. The chosen surface: Max BiPlex, a hybrid artificial grass designed by PST Sport's Managing Director, Colin Teahon and manufactured by CCGrass.

Max BiPlex is a hybrid two-fibre product, extruded to 12,000 and 5,500 dtex respectively. Max BiPlex combines the Max monofilament yarn, made with C8 polymer, with a strengthened fibrillated yarn to create a unique surface. The result is the best possible pitch, combining football performance with safety and durability to meet the club's demands.

Bradford Park Avenue FC have invested in a brand new 3G pitch as a stadium pitch and this was completed over the summer by PST Sport. We are delighted with the playing surface and the work done to deliver the pitch by PST Sport. PST worked with the club from the very start ensuring the project was delivered to specification and project budget. We would not hesitate to recommend PST Sport to clubs wishing to invest in their facilities.

MARK LEADBEATER, CEO, BRADFORD PARK AVENUE FC

FLINT TOWN UNITED FC, WALES

7,800 sq/m FIFA Quality Pro Approved

We replaced the existing grass field at Essity Stadium with a state-of-the-art artificial grass pitch. Works included installing a new drainage system, stone subbase and dynamic stone layer. The chosen surface was our flagship SUBERB 45, a heavy weight premier football surface offering superior playing characteristics, installed onto a performance pad.

THE DEANES SCHOOL, ESSEX

5,900 sq/m FIFA Quality Approved

This project was supported by the Football Foundation

HEMEL HEMPSTEAD TOWN FC

7,900 sq/m FIFA Quality Pro Approved

We constructed a full-size ATP at Vauxhall Road stadium. A further 1,700 sq/m of artificial grass was used to re-turf the existing 6-a-side artificial surface. The stadium pitch which meets FIFA Quality Pro standards is one of the best surfaces in Europe.

High Performance Artificial Grass Pitches for Rugby

MUNSTER RUGBY, CO. CORK

10,500 sq/m World Rugby Approved

PST Sport's SUPERB 60 installed at Munster Rugby's Virgin Media Park is the very latest in artificial turf technology; it is the first of its kind World Rugby Approved pitch. The surface is extremely durable, resilient, soft to touch, controls infill splash and ultimately designed with maximum player safety in mind. Equally crucial is the foundation beneath, a dynamic pitch subbase and irrigation system to ensure maximum longevity and stability.

“ After careful consideration, Munster Rugby decided in early 2018 to convert the natural grass pitch at Musgrave Park to an artificial grass surface. This was a huge decision for the province and choosing the right company to carry out the project was critical. After a competitive tender process where World Rugby Approved consultants were engaged to assess product quality, PST Sport came out on top.

Our experience with PST has been superb – they are definitely the best contractor we have dealt with in Musgrave Park. Nothing has been an issue and they have hit every deadline and promise. PST Sport, along with their manufacturing partner, CCGrass designed a bespoke artificial grass product specifically for Munster Rugby. The feedback from both professional and amateur players alike has been fantastic. We would absolutely recommend PST Sport for any club or school considering installing an artificial grass pitch.

PHILIP QUINN, HEAD OF FINANCE & OPERATIONS, MUNSTER RUGBY

MULLINGAR RFC, CO. WESTMEATH

Full-Size World Rugby Approved ATP & Training Pitch

“ After a competitive tender process among 8 companies a detailed post tender analysis was conducted. PST Sport emerged as the successful contractor and we are delighted that decision was reached. PST Sport delivered a first-class installation on time and within budget and demonstrated excellent technical ability. Feedback from players and coaches has been impressive. The Irish Rugby team trained on the pitch for the week prior to the Ireland v England Six Nations match in 2016. Several players commented that it was the best artificial grass surface they had played on and Joe Schmidt compared the pitch to the Twickenham surface. I would highly recommend Colin and his team to any organisation looking to install an artificial grass facility.

BRENDAN LEAHY, PROJECT MANAGER, MULLINGAR RFC

CLONGOWES COLLEGE, CO. KILDARE

9,000 sq/m World Rugby Approved

“ Not only were PST Sport price competitive, they also offered a value-added service incorporating upgrades to our existing floodlight system and a higher than standard specification carpet. We are delighted with the outcome. I would highly recommend PST Sport as a professional and knowledgeable partner with the capacity to deliver a project on time and to budget with very little fuss.

CHRIS LUMB, HEADMASTER, CLONGOWES WOOD COLLEGE

LE CHÉILE SCHOOL, DUBLIN

 13,500 sq/m **GAA, FIFA & World Rugby** Approved

Fingal County Council approved PST Sport as the design and build company for the development of a full-size 13,500 sq/m artificial grass pitch at Le Chéile Secondary School in Tyrrelstown. For this particular project we took on a design and build role and worked seamlessly with principal contractors, Glasgiven Contracts Ltd., who were the main contractors for Tyrrelstown Educational Campus.

“ PST Sport took a lead in the design development of the pitch and proactively engaged with all stakeholders and brought to the table cost effective and workable solutions without compromising on safety, quality or programme.

PST Sport completed this project safely on time, within budget and to the highest standards. The standard of finish achieved by PST Sport on the pitch is exemplary and is a credit to the management and operatives who we found to be courteous, knowledgeable and driven.

**PADDY CASSIDY, CONTRACTS MANAGER,
GLASGIVEN CONTRACTS LTD.**

GRAVESHAM SPORTS TRUST, KENT

5,800 sq/m Sand-Dressed Field

We rebuilt a subsidised 20-year-old hockey pitch for Gravesham Sports Trust in Kent. The pitch had become almost too dangerous for use. Underneath the surface there were significant areas of subsidence and pitch deformation. They had struggled for some time to find a solution. A complete PST Base™ survey was carried out, scanning the entire surface to determine how the pitch base was constructed. Using the results we were able to formulate a cost-effective design to remedy the subbase, providing a long-lasting pitch base to accommodate the new FastPro surface.

From day one of the project I cannot fault PST Sport for their enthusiasm, technical knowledge and commitment. The innovative ground penetrating survey gave myself and my client surety over our budget and allowed us to pre-plan remedial works thus reducing the programme. PST Sport's attention to detail ensured a smooth and quality installation and has resulted in a top class playing surface that without exception has been positivity received by players. I would not hesitate in recommending PST Sport for future installations.

**SUE JONES, PROJECT MANAGER,
GRAVESHAM SPIRITS TRUST**

ST VINCENTS GAA, DUBLIN

 13,000 sq/m **GAA** Approved

PST Sport constructed a 13,000 sq/m artificial grass pitch for St Vincent's GAA in Dublin. The club sought to replace the existing grass surface adjacent to their senior pitch with a world-class artificial pitch, designed to meet the GAA's highest performance standards.

The project included all civil works, fencing, netting, and floodlights, with our SUPERB 60 carpet over shockpad selected to meet GAA specifications.

SULLIVAN UPPER HIGH SCHOOL, BELFAST

6,300 sq/m Sand-Dressed Field

PST Sport installed a sand-dressed hockey surface at Sullivan Upper High School in Belfast. The installation of a hockey field requires a highly skilled, experienced and dedicated team - qualities that PST Sport have proudly become renowned for.
